Exail partners with U.S. key player to supply 100 navigation systems for naval UUVs

Lincoln (RI), USA, 30/07/2025 – Exail, a leading provider of navigation solutions, has secured a new contract with a U.S.-based global defense player. The agreement involves the delivery of 100 Phins Compact Inertial Navigation Systems (INS) to equip Unmanned Underwater Vehicles (UUVs).

Offering highly precise navigation capabilities, the Phins Compact INS ensures reliable performance in demanding environments and remains resilient to external signal disruptions. Its compact design enables rapid integration, allowing UUVs to carry out missions with flexibility and efficiency, even in dynamic and unpredictable maritime defense scenarios.

"We are grateful for our client's trust in Exail technology. We are confident that our INS will deliver the precision and robustness required for UUVs to operate effectively across varied environments," said Carlos Lopes, Sales Director at Exail. *"Over the years, we've worked closely with our customers to develop a navigation suite that truly meets defense challenges. Today, our INS is a global benchmark in subsea navigation."*

This contract strengthens Exail's global leadership in subsea navigation, with its INS technology trusted by over 50 navies and widely deployed on a broad range of subsea autonomous vehicles worldwide. It also represents a key milestone in the company's expanding presence in the United States, supporting defense programs with proven, high-performance solutions.

About Exail

Exail is a leading high-tech industrial company specializing in cutting-edge robotics, maritime, navigation, aerospace and photonics technologies. With a strong entrepreneurial culture, Exail delivers unrivaled performance, reliability and safety to its civil and defense clients operating in severe environments. From the deep sea to outer space, Exail expands their capabilities with a full range of robust in-house manufactured components, products and systems. Employing a workforce of 2000 people worldwide, the company benefits from a global footprint and conducts its business in over 80 countries. Exail was formed by ECA Group and iXblue joining forces in 2022. It is a subsidiary of Exail Technologies, a family-owned company specialized in high-technology.
